

COMPEX: COMPETENCY IN DESIGN & INSTALLATION FOR HAZARDOUS AREAS

SPECIALIZED TRAINING & ASSESSMENT TO IMPROVE SAFETY

If you have responsibilities associated with hazardous areas - knowledge, skills and competence are critical.

The CompEx scheme offers courses and assessments targeted to the proper design, equipment selection, installation, inspection, and maintenance for potentially explosive atmospheres.

CompEx is an internationally-recognized qualification for hazardous locations installation, inspection and design. It is rapidly becoming a required qualification worldwide, with increased concerns over safety, and standards such as NFPA 70B and IEC 60079-14 driving global compliance.

North American CompEx Year-Round Training:

*Houston, Texas, US: Ex F, Ex 01-04 or Ex 12 in our licensed CompEx center

*Edmonton, Alberta, Canada: Ex 12 courses in the training facility within our lab

*Your facility or offsite: Ex F or Ex 12 (or select Ex 01-04) mobile options available

CompEx Certified Training Courses

CompEx provides competence-based training and assessment for personnel working in hazardous locations in both offshore and onshore industrial environments. Through the use of modular training, CompEx drives confidence along with competency by employing hands-on learning and application, as well as classroom instruction – all combined with a thorough testing and assessment process. Successful completion of a CompEx course can therefore lead to critically important

improved safety for people, equipment, and facilities.

Who Should Attend?

CompEx is applicable to anyone with responsibilities related to explosive/hazardous environments, at any level – including management, design, operations, and maintenance:

- Electrical installers / electricians inspectors
- Electronic and instrument technicians
- Electrical engineers
- Product designers
- Mechanical technicians
- Anyone involved in hazardous area work, no technical background required (Ex F)

North American CompEx Courses

- Ex F: Foundation Course (2-day)
- Ex 01-Ex 04: Gas & Vapor (5-day)
- Ex 12: Application Design Engineers (5-day)
- General: Overview & Refresher Courses (Custom or varies)

Let Our Experts Train Yours

Intertek is the largest provider of CompEx courses worldwide, with years of expertise training and assessing personnel from various industries and companies across the globe. Our experts participate and lead

international committees for standardization, and incorporate the latest requirements and industry information into course applications and other work with clients. Intertek is an ATEX Notified Body and Nationally Recognized Testing Laboratory (NRTL), as well as an IECEx Certifying Body. Our expertise in hazardous area equipment and practices extends to every facet of safe operation.

CompEx Courses are available through our licensed CompEx centers and fixed sites, as well as via mobile rigs, available for training onsite at corporate facilities, or at a convenient location nearby.
