

FIELD EVALUATION SERVICES

DEMONSTRATE CODE COMPLIANCE FOR PRODUCTS INSTALLED IN THE FIELD.

Intertek provides fast, expert and efficient Field Evaluation service, helping you to show compliance to the latest standards. We know that a red-tag can halt production and we can be available and on-site fast to get you back in business.

Red-Tagged Equipment? No worry.

Have you been 'red-tagged' by an inspector or official who will not approve your installation because electrical codes or product safety regulations have not been met? Authorities Having Jurisdiction (AHJs) can shut you down until installed equipment is evaluated to required standards and electrical codes.

We can help. Our Field Evaluation services get you back on track – quickly and affordably.

Intertek's Field Evaluation Process

Our Inspectors walk you through the process, evaluate your product, and assist you with approval from the Authority Having Jurisdiction.

Whether you need to meet requirements for installed food service equipment, industrial machinery or custom electrical equipment, our inspectors are knowledgeable and trained to provide the highest levels of client service.

We Put You Back in Business - FAST

Count on Intertek to speed up the Field Labeling process and get you back in business quickly. With laboratories and offices across the U.S., we respond to your request quickly and can be on-site in as little as 24 hours!

Our technical staff are trained to evaluate your product at the installation site, efficiently and accurately.

Accreditations

Intertek is an accredited Test Lab and Certification Body by the Standards Council of Canada (SCC) and in the U.S. is an OSHA recognized NRTL. We are also accredited by IAS (International Accreditation Service) as a Field Evaluation Body.

Authorities Having Jurisdiction (AHJs) in 50 states and throughout Canada accept the ETL Mark as proof of product safety. Today, the ETL mark is featured on millions of products sold by major retailers.

Sanitation Testing

Intertek also provides field labeling of unlabeled food service equipment in restaurants, hotels and other establishments. We can label your food equipment for sanitation and/or safety.

Electrical and Gas Powered Products

Once your equipment is found to be in compliance, the ETL Field Evaluated label will be applied. The ETL Field Evaluated Mark tells inspectors that your product complies with nationally accepted standards. It will also reflect your unique serial number that is recorded in your report. If you have a question regarding your equipment, your serial number enables us to access your information quickly.

Fire Doors, Frames, and Windows

Intertek's provides field labeling service of unlabeled fire doors, frames and windows. By having your fire doors or openings labeled with our Warnock Hersey (WH) Mark prior to inspection, inspectors can review their checklist and provide you with a state of readiness for your facility. Learn more about Doors.
